Research Papers

Parallel computation for streamflow prediction with distributed hydrologic models
T.K. Apostolopoulos and K.P. Georgakakos 1
Estimating fluctuation quantities from times series of water-table depths using models with a stochastic component
M. Knotters and P.E.V van Walsum 25
Origin of pore water and salinity in the lacustrine aquitard overlying the regional aquifer of Mexico City
A. Ortega-Guerrero, J.A. Cherry and R. Aravena 47
Evaporation components of a boreal forest: variations during the growing season
A. Grelle, A. Lundberg, A. Lindroth A.-S. Morén and E. Cienciala 70
Applying stochastic simulation techniques to a deterministic vadose zone solute transport model
Q.J. Wu, A.D. Ward, S.R. Workman and E.M. Salchow 88
A dynamic model for assessing the impact of coupled sulphur and nitrogen deposition scenarios on surface water acidification
A. Jenkins, R.C. Ferrier and B.J. Cosby 111
A multi-channel suspended sediment transport model for the Mackenzie Delta, Northwest Territories
S.R. Fassnacht 128
Ground water modeling of mise-a-la-masse delineation of contaminated ground water plumes
J.L. Osiensky 146
Calibration of a modified SFB model for twenty-five Australian catchments using simulated annealing
N.R. Summer, P.M. Fleming and B.C. Bates 166
Determining the recharge mode of Sahelian aquifers using water isotopes
P. Girard, C. Hillaire-Marcel and M.S. Oga 189
Methods for combining the outputs of different rainfall–runoff models
A.Y. Shamseldin, K.M. O'Connor and G.C. Liang 203
Development of regional parameter estimation equations for a macroscale hydrologic model
F.A. Abdulla and D.P. Lettenmaier 230
Application of regional parameter estimation schemes to simulate the water balance of a large continental river
F.A. Abdulla and D.P. Lettenmaier 258
Transformation and normalization of variates with specified distributions
R. Krzystofowicz 286
Groundwater circulation and geochemistry of a karstified bank–marginal fracture system, South Andros Island, Bahamas
F.F. Whitaker and P.L. Smart 293
Ground penetrating radar for determining volumetric soil water content; results of comparative measurements at two test sites
R.A. van Overmeeren, S.V. Sariowan and J.C. Gehrels 316
Groundwater flow beneath a hypersaline pond, Cluett Key, Florida Bay, Florida
T. Juster, P.A. Kramer, H.L. Vacher, P.K. Swart and M. Stewart 339
A distributed approach for sediment yield evaluation in Alpine regions
G.A. Bemporad, J. Alterach, F.F. Amighetti, M. Peviani and I. Saccardo 370
